## EDUCATION

### Computer Engineering

Zeal college Of Engineering And Research  
pune

07/2020 - 07/2024

8.40SGPA

### HSC

Rajmata Jijau College Dudulgaon Pune.

07/2019 - 07/2020

72%

### SSC

Jawhar Vidyalaya, Andur

07/2018 - 07/2019

85%

## WORK EXPERIENCE

### Intern

Elite Softwares Pvt.Ltd.Pune

01/2023 - 03/2023

Pune Maharashtra

Elite Software is Pune based Software Company since 2011 with more than 1000 Clients and developed more than 8000 Students for Self Employment in Web Development.

#### Tasks

- Developed a Web Application Using different Framework.
- Worked with server-side and front-end technologies and leveraged common design patterns to code dynamic and user-friendly systems.
- Learned about web and domain hosting.
- Learned Framework like Bootstrap

## CERTIFICATES

Java Certification Course

Java Data Structure and Algorithm Masterclass

HTML, JavaScript, Bootstrap Course.

Nodejs, Expressjs, MongoDB Completion  
Certificate

## SKILLS

Java

HTML

CSS

SQL

JAVASCRIPT

REACTJS

Nodejs

Expressjs

Bootstrap

Problem Solving

Data Structure And Algorithm

Full Stack Developer

## PERSONAL PROJECTS

### Recipe Finder [🔗](#)

- Developed a Recipe Finder website using React.js.
- Leveraging an API to dynamically fetch and display recipes based on user search queries.
- Used different concept of reactjs like hooks , state management, usecontext
- Implemented state management using React's Context API, streamlining the sharing of state across various components without prop drilling.

### Traveler Web App With ReactJs [🔗](#)

- Developed a dynamic web application using ReactJS, focusing on delivering a responsive and user-friendly interface.
- , integrated advanced concepts including state management, context API, and routing for dynamic and seamless user experiences.

### Real Time Chat Application Using MERN

- Developed a Real Time Chat Application using React.js.
- Designed and built reusable, modular components, significantly improving the application's scalability and maintainability.
- Used backend technology such as Nodejs , Expressjs to create API.
- Used MongoDB database
